HIGH-END AUDIO PRODUCTS

Kharma Butterfly®

Compact high performance audio system

KHARMA
BUTTERFLY®

The new Kharma Butterfly®

Designed for those who demand a compact system
alongside incredible performance

For over 25 years Kharma is known for its craftsmanship, unmatched audio quality, innovation and design. This passion for the perfect music representation always has been realized in elegant and high quality finished loudspeaker designs, but never before we reproduced this refined audio quality in such a compact design.

Kharma proudly presents an unique combination of satellite speakers and a powerful subwoofer, called the Kharma Butterfly system. Despite the compact design, this new system will amaze many while listening to it for the first time. This as a result of many years of experience in the top of the High-End audio market and months of engineering on each detail.

The Butterfly Satellite speakers will give a refined music representation, while the Butterfly Subwoofer adds low bass to deliver an impressive experience. This true musical journey can easily be integrated in any domestic environment, because we made it possible to have an aesthetic stand option to place the Satellite speakers on the floor, any bookshelves or dressoir, the wall or the ceiling. Adding pure audio and visual pleasure as a core value to your life.

Butterfly Speaker

Our goal was the creation of a fresh new lifestyle audio product. Because we believe a refined music representation will enrich your life. We have challenged nature to be able to create a Satellite speaker that sounds refined, but accepts a modest sized cabinet. The backbone of the solution is the use of high-quality materials and clever engineering. With a high-gloss painted finish, the aluminum enclosure realizes a perfect match with amongst others the in-house developed composite cone used for the midrange section.

Butterfly Subwoofer

As bass is essential to bring music alive, we've created a modest sized subwoofer that complies with this need and at the same time has the intelligence and power to control the whole Butterfly system. As the Butterfly system is all about combining design and performance, we've hidden a lot of technology in the Butterfly Subwoofer. The amplification for the Subwoofer and for up to four Satellites is integrated in the aluminum enclosure of the Subwoofer. Moreover, 4 different modes make it possible to adjust the performance to your needs. How you want to control your music is all up to you. You have the freedom to plug in any volume controlled device like your mobile, computer, pre-amplifier or streaming device, directly into the Subwoofer.

Stylish mounting solutions for every room

Each decorated room has its own unique style, acoustic properties and dimensional drawbacks, but though there is always the strong desire to experience music in the room as it is intended. By offering several stand options the Kharma Butterfly system easily blends in every living room, suiting every desire of detailed sound representation.

Deskstand

Plug-and-play
Easy to place on bookshelves, dressoirs or in open closets.
Speaker can be tilted in the vertical plane

Floorstand

Plug-and-play
Minimal soundwave diffractions by freestanding nature, Speaker can be tilted in the vertical plane

Wallmount

In-wall wiring required
Easy installation on universal electric pot
Speaker can be tilted in the vertical plane and rotated in the horizontal plane

Ceilingmount

In-wall wiring required
Speaker can be tilted in the vertical plane and rotated in the horizontal plane

The truth is in the details

Aluminum enclosure

The enclosure of the satellite and the subwoofer are both completely constructed of aluminum, making it rigid and durable.

Outstanding performance

Kharma Composite drivers

With Kharma speakers several times being awarded as the best in the world, we have used the same know-how from our top line models in the creation of a composite cone driven midrange unit for the satellites.

System specifications

System:	Active Digitally Controlled 3 way system
Possible set-up:	2.1 4.1 5.1 (additional amplification required, contact your dealer for more information)
Features:	4 presets for Digital Signal Processing Master / slave switch subwoofer*
Power output satellites:	2 x 120 Watts with 1% THD
Power output subwoofer:	1 x 180 Watts with 1% THD
THD + Noise:	> -90dB
Signal input impedance:	100 k Ω
Frequency response:	30Hz - 20KHz
Maximum SPL:	109dB (+ 3dB with 4 Satellites)
Preset explanation:	High-end mode: Optimized for high-end performance High-end Bass mode: Corrected for room acoustics Event mode: Tuned for loud performances Loop mode: Intended for 5.1 set-up
Accessories:	Power cord, loudspeaker cable of 3m and 6m
Finishes:	Butterfly Grey, Piano White or Diamond Black

* Set-up can easily be expanded with a second subwoofer by plugging in the second subwoofer on the first and switching to slave mode.
